

Karpenter in AKS

Agenda

-
1. Introduction Node Auto Provisioning
 2. Components
 3. Limitations
 4. Demo

Node Auto Provisioning (NAP)

NAP uses Karpenter for node scaling

Manage nodes based on pending pods

Right-size nodes

Delete underutilized nodes

Many configuration options

Components

NodePool

AKSNodeClass

NodeClaims

Limitations

Can't use NAP with cluster autoscaler

Windows node pools aren't supported

You can't stop a cluster using NAP

The cluster egress outbound type can't be changed

IPv6 clusters aren't supported

Demo
