

The AKS MCP Server is Awesome

Agenda

-
1. AKS MCP Server
 2. Problems with Docs
 3. Demo

AKS MCP Server

Installed via Helm Chart

Can access all resources inside AKS

Create resources, e.g. fix broken apps

Use Entra Workload ID for cluster operations

Problems with Documentation

Objectively Broken: Code blocks that immediately crash your terminal

Massive Information Gaps: No information on foundational steps like App Registration setup

Zero Context: Crucial paths and security flags left entirely to guesswork

Demo

Setup new AKS

Configure Entra Workload ID

Deploy and configure AKS MCP

Show MCP Server capabilities

Deploy demo app

Fix demo app using the MCP Server

Demo
